Why Have Supplements For Grass Fed Cattle?

12 Stones Grassland Beef® and **Advanced Biological Concepts®** have teamed up to supply nutritional tools for the grass cattle industry to maximize animal health and forage utilization. It is our goal to provide help when the restricted environment does not supply what an unrestricted grazing environment could for a complete nutritional profile. Soil and forage management are making great advances and are a primary way to achieve your grass management goals. Our goal is to provide tools that we have found to be needed to overcome adversity that is a normal part of life and nature. Animal health and nutrient dense food need not be compromised because of that adversity. Our products are grass based and all ingredients fit the natural grass source nutritional standards for grass finished beef.

Beef cattle are starvation resistant animals that have been a tool to market by-products and waste for years. The move toward grass finished beef has been motivated by nutritional research clearly defining differences in biochemical composition of meat based on nutrition and management. Our goal is to assure the nutrient density of grass fed beef is all that it can and should be despite fluctuations in environmental conditions. A healthy, pleasurable eating experience is critical for the grass finishing industry to assume its rightful role in American Agriculture.

All In One Mineral for Beef and Dairy Cattle

12 Stones Mineral Feeder

For Individual Free Choice Minerals

Feeding Free Choice Minerals Has Effects on Many Levels.

- * Allows the animal to balance nutritional minerals and trace minerals.
- * Allows the animal to balance the Cation/Anion charge in feed.
- * Allows the animal to balance the Cation/Anion charge in water.

12 Stones “Low Boy” Mineral Feeder

Space for 12 Different Items

Feeder plans are available upon request.

12 Stones Mineral Kits

Contain Individual Free Choice Minerals

*See pages 3-9 for information on each of the individual minerals.

12 Stones Mineral Refill Kit

Item no. B019

Includes One 25 lb Bag of Each of the Following Minerals:

- 12 Stones A Mix
- 12 Stones BVC Mix
- 12 Stones Cu Mix
- 12 Stones K Mix
- 12 Stones P Mix
- 12 Stones TS K Mix
- 12 Stones Buffer Plus
- 12 Stones C Mix
- 12 Stones 2% I Mix
- 12 Stones M Mix
- 12 Stones S Mix
- 12 Stones Zn Mix

12 Stones 40 Bag Free Choice Pallet

Item no. B017

Recommended for 250 head (40 x 25 lb bags) Based on average usage

Includes:

| | |
|-----------------------|---------|
| 12 Stones A Mix | 11 Bags |
| 12 Stones BVC Mix | 9 Bags |
| 12 Stones Buffer Plus | 2 Bags |
| 12 Stones C Mix | 4 Bags |
| 12 Stones Cu Mix | 1 Bag |
| 12 Stones 2% I Mix | 1 Bag |
| 12 Stones K Mix | 2 Bags |
| 12 Stones M Mix | 1 Bag |
| 12 Stones P Mix | 4 Bags |
| 12 Stones S Mix | 2 Bags |
| 12 Stones TS K Mix | 2 Bags |
| 12 Stones Zn Mix | 1 Bag |

12 Stones 80 Bag Free Choice Pallet

Item no. B018

Recommended for 500 head (80 x 25 lb bags) Based on average usage

Includes:

| | |
|-----------------------|---------|
| 12 Stones A Mix | 22 Bags |
| 12 Stones BVC Mix | 18 Bags |
| 12 Stones Buffer Plus | 4 Bags |
| 12 Stones C Mix | 8 Bags |
| 12 Stones Cu Mix | 2 Bags |
| 12 Stones 2% I Mix | 2 Bags |
| 12 Stones K Mix | 5 Bags |
| 12 Stones M Mix | 2 Bags |
| 12 Stones P Mix | 7 Bags |
| 12 Stones S Mix | 4 Bags |
| 12 Stones TS K Mix | 4 Bags |
| 12 Stones Zn Mix | 2 Bags |

Should I Supplement Selenium? Selenium is not included in our free choice kits; however, we do offer a Selenium mix which can be purchased separately and offered if needed. While many soils are Selenium deficient, some may have excessive amounts of selenium. To find out if your area is selenium deficient, consult your local veterinarian.

Offer Free Choice White Salt in addition to all 12 Stones Free Choice products.

12 Stones Organic Pellets

(formerly Cal Cubes)

An affordable, all natural, grass-based supplemental energy source for grass fed cattle during times of special need.

Organic Alfalfa is combined with Organic Molasses and enzymes to produce an energy rich supplement to maintain the proper protein/energy ration when poor forage makes it tough. 1,000,000 calories per pound make this the tool we always need but could not find in adverse situations. One pound, per head, per day make **12 Stones Organic Pellets** an economical and easy to feed energy source that fits grass-fed standards.

Uses include:

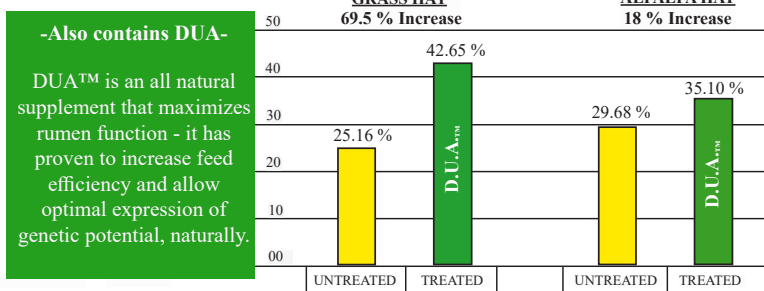

- Assuring finish on grass cattle the last 45 to 90 days of finishing
- A nutritious reward to gentle and train cattle
- Balancing protein to energy on poor forage
- Extra energy for preconditioning for times of stress like transport or stockers going to grass
- Shorten breeding season by getting cows gaining prior to breeding despite forage quality
- Sustainable nutrition when Mother Nature throws a curve like drought

RECOMMENDATIONS:

- Finishing cattle – ½ to 1 # per head per day to optimize protein/energy ratio with forage for maximum finish during last 45 to 90 days
- Cows and bulls – use as needed for training or supplementation during critical periods of poor forage
- Growing cattle – ½ # per head per day when forage quality is not sufficient to allow optimum growth to fit marketing plan

Neutral Detergent Fiber Digestion

Independent Lab studies of D.U.A.™ effect on digestion of Neutral Detergent Fiber Digestion yielded the following results.

-Also contains DUA-

DUA™ is an all natural supplement that maximizes rumen function - it has proven to increase feed efficiency and allow optimal expression of genetic potential, naturally.

12 STONES FACTORS LIQUID

For Livestock Production And All Classes Of Horses

GUARANTEED ANALYSIS

Protein (min)..... 0.5 % Fat (min)..... 0.1 % Fiber (max)..... 1.0 %

INGREDIENTS:

Liquid Lactobacillus Acidophilus Fermentation Product, Organic Aloe Vera Gel Concentrate, Palm Oil, Organic Feed Grade Dried Milk, Potassium Citrate, Citric Acid, Water, Sodium Sulfate, Magnesium Sulfate, Calcium Sulfate, Silicon Dioxide, Yucca Schidigera Extract, Salt, Organic Cloves, Organic Egg Product, Niacin, Ferrous Sulfate, Diatomaceous Earth, Organic Dehydrated Alfalfa Meal, Organic Gentian Root, Biotin, Choline Chloride, Thiamine Mononitrate, Folic Acid, Riboflavin, Lactic Acid, Pepsin, Pyridoxine Hydrochloride, Organic Coconut Oil, Organic Barley Hulls, Yeast Culture, Organic Ginger, Organic Peppermint, Organic Sweet Orange Peel, Organic Dandelion, Organic Violet Leaves, Vitamin B12 Supplement, Organic Garlic, Potassium Chloride.

DIRECTIONS:

- Newborn Calves:** Add to the Milk Replacer: At 1/2 oz per calf twice daily for 5 consecutive days.
- Receiving Calves and Times of Stress:** Add to the Milk Replacer: At 1/2 oz per calf twice daily for 3 consecutive days.
- Oral Application:** At 1 oz per calf once daily for 3 consecutive days.
- Mature Cattle: Oral application/Top Dressing/Within Total Mixed Ration:**
At 1 oz per head per day for 3 days. Wait 12 days. Repeat at 1/2 oz per head per day for 3 days. Wait 12 days. Repeat at 1/2 oz per head per day for 3 days.
Note: For continued support repeat "Receiving and Times of Stress" application every 21 days until off milk.
- Equine Immune Support:**
1 ounce per horse per day for 7 days. Repeat in 3 weeks. Can be administered orally or top-dressed on the grain ration.
Note: At times of stress or immune system changes, give 1/2 ounce per horse per day as needed. Can be administered orally or top-dressed on the grain ration.
- Girls:** At 1/2 oz per head per day for 5 weeks and 2 weeks pre farrowing.
- Sows:** At 1/2 oz per head per day for 3 weeks pre farrowing.
- Pigs 40 pounds and up:** 1 gallon per ton of complete feed for 3 days.
- Pigs under 40 pounds:** 2 gallons per ton of complete feed for 3 days.

THIS PRODUCT MEETS THE SPECIFICATIONS FOR

1 Gallon (3.79 Liters)

TECHNICAL BULLETIN

12 Stones Factors Liquid®

12 Stones Factors Liquid contains Transfer Factor technology (cell mediated immunity) as well as antibodies derived from bovine colostrum and hyper-immune egg yolk antibodies (humoral immunity).

Transfer Factors are natural occurring immune substances in the bodies on all mammals and birds. They are present in the leukocytes (white blood cells). It is now well established that extracts from leukocytes contain lymphokines and several other immuno-active components.

Transfer Factor is a very small molecule having a molecular weight of less than 10,000 DA. It's function is to transfer critical immune information to cells and is present in significant amount in bovine colostrum and in egg yolks. In nature, one of its most important function is to transfer maternal immunity to the newborn. This is nature's way of transferring knowledge about fighting disease from one generation to the next.

Transfer Factor was discovered by Dr. D. S. Lawrence in 1949. He showed that specific cellular immunity could be transferred from one immunized donor, to an un-immunized recipient. While the results from using Transfer Factor appear similar to those seen with bovine colostrum or egg yolk antibodies, the mode of operation is vastly different; cell-mediated immunity verses Humoral (Antibody protection) immunity. Cell-mediated immunity plays a key role in the control of infections and auto immune diseases.

Transfer Factor enables the recipient's immune system to deal with pathogens it couldn't successfully fight by itself. Administration of transfer factor from immune individuals permits recipients to mount a successful immune response. Transfer Factor helps to regulate immune reactions in order for the immune system to reach a healthy equilibrium.

Transfer Factor can be used to increase or re-establish impaired immunity for combating existing infections or transfer new immunologic information to prevent new infections in exposed individuals. Unlike the antibodies and proteins found in egg yolks and colostrum alone, Transfer Factor, being such a tiny molecule survives the digestion process and is easily absorbed from the gut. Stomach acids and digestive enzymes do not degrade their potency.

There are no known adverse side effects to the use of Transfer Factor. Transfer Factor is extremely potent and can be administered in very small amounts which will confer specific cell-mediated reactivity on a normal recipient, lasting for over a year in some cases. There is more than 50 years of intensive research backing it up with hundreds of papers written about it. One of the references appears below, and more can be found on the internet.
